Centenary Stage Company

CSC believes in the value of being an integral member of the regional community, and pursues this goal through the continued presence in community organizations and ambitious outreach activities.

Arts In Education

- Children motivated in the arts develop attention skills and strategies for memory retrieval that also apply to other subject areas.
- Training in acting appears to lead to memory improvement through the learning of general skills for manipulating semantic information.
- Students who regularly participate in a comprehensive arts program are four-times more likely to be elected to class office; four-times more likely to be in a math or science fair, and four-times more likely to win an award for writing, according to research published by Americans for the Arts.
